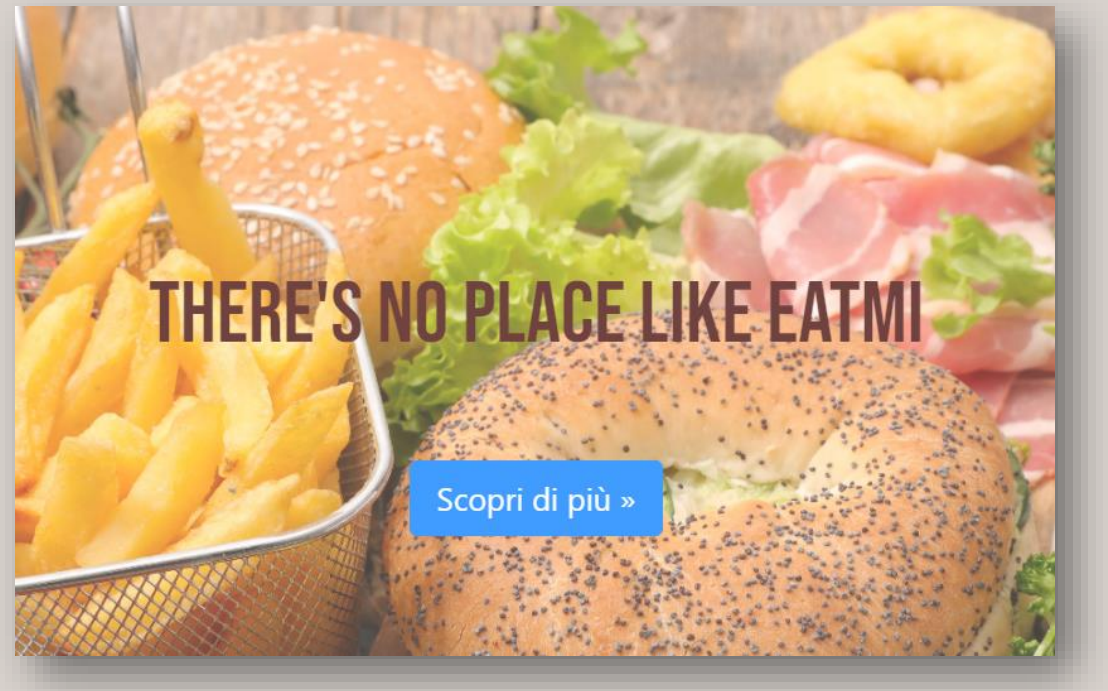
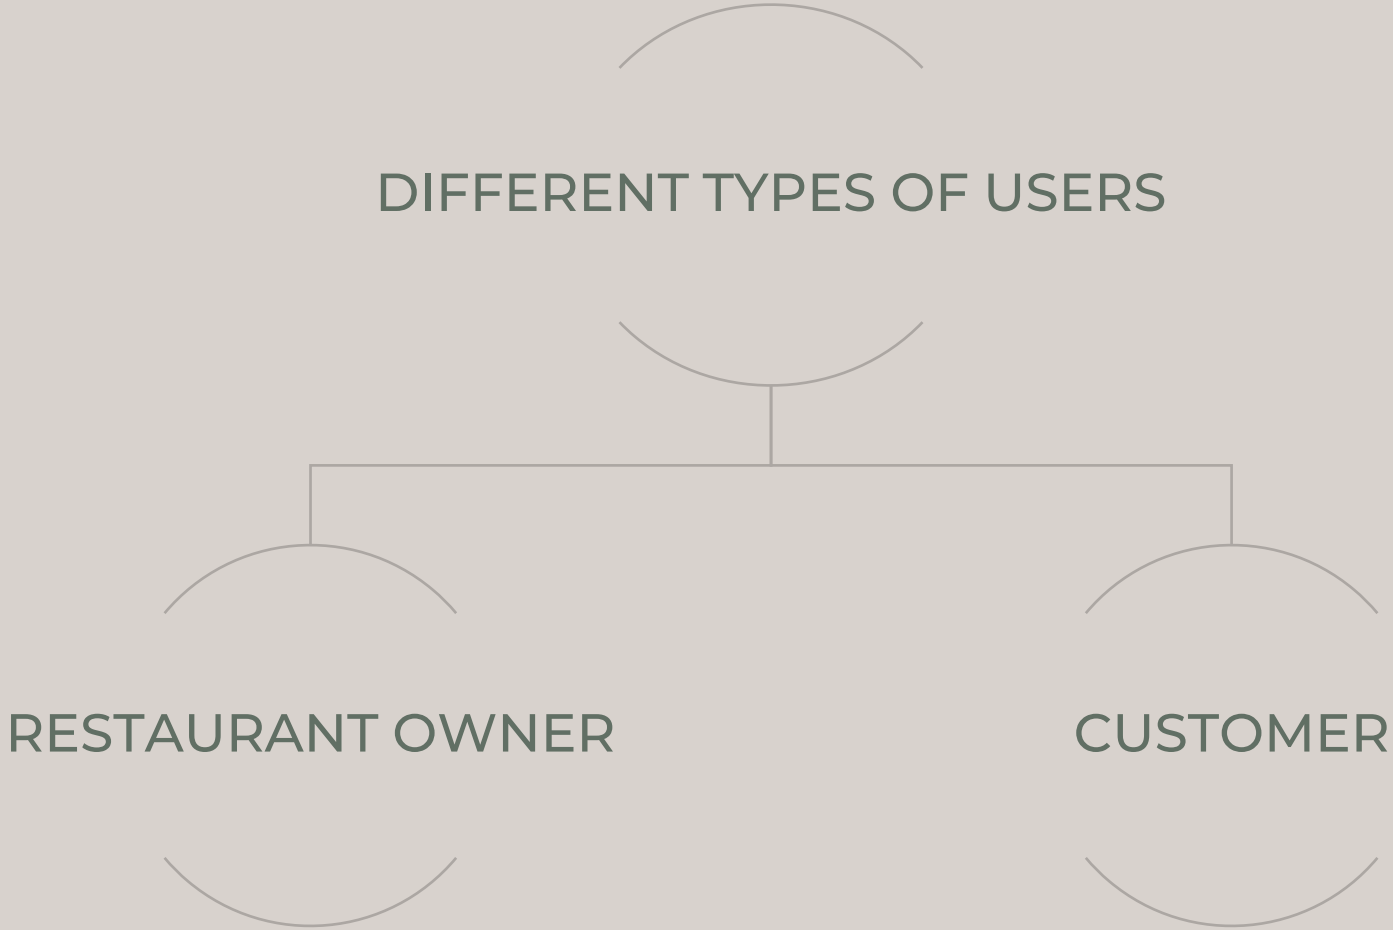
03 FUNCTIONALITIES

01 INTRODUCTION

The project simulates the normal operation of an online restaurant ordering website. Through the application, you can register and log in as both a restaurateur and a customer



DIFFERENT TYPES OF USERS



RESTAURANT OWNER

Who can decide the menu based on a list of products common to several restaurants, add an own personalized dish, modify information and also delete profile

CUSTOMER

Who can also change his personal information, simulate a purchase of products at a restaurant and select the type of pick-up (at the restaurant or by home delivery)

02 USED TECHNOLOGIES

Page structure
